Opportunities for x86 in Embedded Processing (2009 Edition)

One of a series of 4 reports on ARM, MIPS, Power Architecture & x86
in Embedded Processing | Published June 2009 | 84 Pages

\$5,250/EU3,675/£3,180 for 1-4 Seat PDF License

\$6,560/EU4,595/£3,980 for Intranet PDF License + Excel Tables

Opportunities for x86 in Embedded Processing - Report Overview

Key features of the study include:

- One of a series of 4 reports on ARM, MIPS, Power Architecture & x86 in Embedded Processing.
- Coverage of the market for x86-based MCUs/eMPUs, ASICs/ASSPs and FPGAs.
- Analysis of 20 application areas, providing detailed coverage of each end-use sector.
- Unit, revenue and average pricing (ASP) analysis for x86-based MCUs/eMPUs, ASICs/ASSPs and FPGAs in each application. Base year is 2008, with forecasts to 2014.
- 2008 supplier market share estimates for x86-based embedded processors.
- Highly quantitative analysis, with discussion summarized in short, easy to read bullet points.
- PDF and Excel delivery options available.

Application Analysis

The study provides analysis of the market for x86-based embedded processors in each of the following application areas.

- Automotive Under-the-Hood Electronics
- Cellphones & Communicators
- Wired Communications Infrastructure
- Compute Platforms
- Office Equipment & Computer Peripherals
- Handheld Games Consoles
- Cameras & Camcorders
- DVD Recorders & Players
- Industrial Automation & Drives
- Chip Cards & Payment Processing
- Automotive Entertainment Systems
- Customer Premises Equipment
- Wireless Communications Infrastructure
- HDDs & Storage Systems
- Wired Games Consoles
- Media Players/MP3 Players
- TVs & Set-top Boxes
- Other Consumer Electronics
- Medical Electronics
- Other Industrial Electronics

For each application area, the study provides analysis of units, revenues and average pricing (ASP) for each of the following product types. Base year for analysis is 2008, with forecasts to 2014.

- x86-based MCUs/eMPUs
- x86-based ASICs/ASSPs
- x86-based FPGAs

Example Tables

Opportunities for x86 in Embedded Processing by Application - Revenue Summary

Revenues (\$m)	2008	2009	2010	2011	2012	2013	2014	CAGR (08/14)	DIFF (08-14)	SUM (08>14)

Table of Contents

Section 1—Executive Overview

Key Point Conclusions

Section 2— Scope & Method

2.1 Scope

2.2 Research Method

2.3 Embedded Processing Service

Section 3— Application Analysis

3.1 Automotive Under-the-hood

3.2 Automotive Entertainment Systems

3.3 Cellphones & Communicators

3.4 Customer Premises Equipment

3.5 Wired Communications Infrastructure

3.6 Wireless Communications

Infrastructure

3.7 Compute Platforms

3.8 HDDs & Storage Systems

3.9 Office Equipment & Computer

Peripherals

3.10 Wired Games Consoles

3.11 Handheld Games Consoles

3.12 Media Players/MP3 Players

3.13 Cameras & Camcorders

3.14 TVs & Set-top Boxes

3.15 DVD Recorders & Players

3.16 Other Consumer Electronics

3.17 Automation & Drives

3.18 Medical Electronics

3.19 Chips Cards & Payment Processing

3.20 Other Industrial Electronics

Section 4— Opportunities for x86-based MCUs/eMPUs in Embedded Processing

Section 5— Opportunities for x86-based ASICs/ASSPs in Embedded Processing

Section 6— Opportunities for x86-based FPGAs in Embedded Processing

Analyst Biography

Colin Barnden - Principal Analyst

Colin joined Semicast Research in June 2006 and is principal analyst for semiconductor research and vice president of business development. Prior to joining Semicast, he worked for 12 years at IMS Research, rising to the position of Senior Research Director of its Semiconductor Research Group and responsible for analyst coverage on the analog/mixed signal, optoelectronic and embedded processing industries. Colin also set-up and established IMS Research's Automotive Electronics Group. During his tenure, Colin authored dozens of reports and became a well respected industry analyst. He holds a B.S. in Electronic Engineering from Aston University, England.

About Semicast

Semicast Research is a respected provider of independent market research on the semiconductor and electronics industry.

It specializes in coverage of new and emerging applications including industrial semiconductors, wireless semiconductors, automotive electronics, telematics/infotainment, digital consumer convergence and embedded processing.

Its analysts use a combination of technical understanding, a proven background in market research and specific applications knowledge to produce concise and timely research to help you make effective business decisions.

Semicast Research is a privately-held company and is not tied to any media or financial organizations. This gives vital impartiality in making independent market forecasts, free of alternative agenda or bias.

**Opportunities for x86 in Embedded Processing
 (2009 Edition)**

I confirm my order for “Opportunities for x86 in Embedded Processing (2009 Edition).
 Please invoice me for the amount as specified below.

Specify	Deliverables	License Type	Price	Total
[]	PDF by e-mail	1-4 Seats	\$5,250/EU3,675/£3,180	
[]	PDF by e-mail + excel	Intranet/Enterprise	\$6,560/EU4,595/£3,980	

Notes:

- Analyst support time is included to answer all reasonable questions relating to forecasts and conclusions.
- PDF files are fully printable.
- 1-4 seat licenses permit access for up to 4 permanent employees of the purchasing company. Intranet storage is prohibited.
- Intranet/Enterprise licenses permit storage of the research on the purchasing company’s intranet for access by permanent company employees.
- Orders from the UK invoiced in Sterling. VAT will be added to UK orders.
- Orders from the Euro Zone invoiced in Euros. VAT number must be quoted for all orders from the EU.
- All other orders invoiced in US Dollars.
- Invoice payment terms are net 30 days.
